(a) Version 1 simulation and exact D_n
Normal
Exponential
Uniform
Mean noise, R = 2,000
10^{1}
10^{0}
10^{-1}
10^{-2}
10^{-3}
10^{-4}
10^{-5}
10^{1}
10^{2}
10^{3}
10^{4}
Sample size n
(b) R at which the noise equals D_n
Uniform
Laplace
Student-t(5)
Student-t(3)
Chi-square(5)
Exponential
R = 6,000
R = 2,000
10^{14}
10^{12}
10^{10}
10^{8}
10^{6}
10^{4}
10^{2}
10^{1}
10^{2}
10^{3}
10^{4}
Sample size n
